

DISCIPLINE FastFacts

from Academic Analytics

Collaborations with other disciplines most often involve researchers in Business Administration where they account for **9.1%** of all co-authored journal publications. The next frequent collaborative field, Management, accounts for **6%** of the total co-authored journal publications for Accounting. Do you know who are the top potential collaborators in these fields that best complement your research and where they are located?

Since **Academic Analytics** uses the individual researcher as the unit of record, we can look across all faculty in a discipline to view their current rank and the years since their most advanced degree.

| FULL professor | ASSOCIATE professor | ASSISTANT professor |
|--|---------------------|---------------------|
| 28 YEARS | 15 YEARS | 5 YEARS |
| Average academic ages (years since their most advanced degree) of Accounting scholars nationally | | |
| Percent of faculty ranks within the national discipline | | |
| 33% | 31% | 36% |

How does the distribution of faculty in your department compare to the national averages, and what are the implications for planning?

Research Insight from Academic Analytics can help answer that.

There are **2,236** individuals in the **Academic Analytics** database who are affiliated with Accounting departments.

Of the faculty population for whom we can infer gender

| | |
|------------|------------|
| 67% | 33% |
| MALE | FEMALE |

According to the data captured in the **Academic Analytics** database, **20%** of Accounting faculty have received a national honorific award. The American Accounting Association provides the most honorific awards for the discipline, granting **78.3%** of all recorded awards. Of the faculty population for whom we can infer gender, the distribution of awards provided by the American Accounting Association is **73.6%** of awards going to male scholars and **26.4%** going to female scholars.
